DETAILED ACTION

This Office action is responsive to the amendment filed on June 22, 2005.

1. Claims 9-23 are allowed and renumbered as 1, 5-11, 2, 12-14, 3-4 and 15, respectively.
2. The following is an examiner's statement of reasons for allowance: the prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of independent claims 9, 10, 16, 18, and 23, especially when these limitations are considered within the specific combination claimed.

In particular, the cited arts do not disclose the first intermediate substrate having a plurality of first bonding pads and the second intermediate substrate having a plurality of second bonding pads, each of the first bonding pads of the first intermediate substrate being electrically connected to an associated one of the first pads of the first semiconductor chips, and each of the second bonding pads being electrically connected to an associated one of the first pads of the first semiconductor chip, as recited in claims 9-10, 18 and 23, and the first and second intermediate substrates including at least one of a capacitor and a resistor, as recited in claim 16, and these features could not easily be conceived of even by a person skilled in the art in the light of the features disclosed in the cited prior arts (e.g., Ball) wherein the first and second intermediate substrates (14A-14B) are dice mounted on the board by flip-chip bonding and they do not have any bonding pad connected to the pads of the semiconductor chip mounted thereon.
